PROFESSIONAL SUMMARY

I'm an Information Management student at NOVA IMS, building on a Science and Technology background. I'm curious about how organisations use information and technology to solve practical problems, and I enjoy learning by doing, exploring new tools, and working with others. Through my studies, club activities, research projects, and hackathons, I've developed an adaptable and analytical approach. I'm now seeking a summer internship where I can contribute, keep learning, and build practical experience in information management.

EDUCATION

Bachelor's in Information Management **2025–Present**
NOVA IMS
Current grade: 16.00/20

Science and Technology **2017–2025**
Colégio Sagrado Coração de Maria
Final grade: 17.78/20

EXPERIENCE AND PROJECTS

Research and Development Associate **2026–Present**
NOVAe R&D, NOVA Entrepreneurship Club

- Assist the club in developing and updating its official website.
- Set up cloud-based databases to organise information for the student entrepreneurship club.

Student Research Project: The Impact of Diet on Chicken Growth and Health **2024–2025**
Colégio Sagrado Coração de Maria

- Observed and documented chicken behaviour and growth over a two-month period; collected, processed, and analysed data.
- Formulated a hypothesis and evaluated results to develop evidence-based conclusions.

Hackathons

- Took part in health and AI hackathons, gaining experience in collaborative problem-solving and project work.

Participant and Speaker **2022–2025**
Sagrado MUN

- Participated in simulated United Nations council sessions, practising critical thinking, public speaking, and collaboration.

SKILLS AND TOOLS

Data and databases: SQL, cloud-based databases, data collection and analysis
Programming and web: Python, SAS, VS Code, GitHub, website development
Tools: Microsoft 365 (Excel, Word, PowerPoint, Outlook)
AI-assisted development: Codex, Cursor, Antigravity, Claude Code
